About Seeds of Origin

Seeds of Origin is a philosophy that teaches the natural hierarchy of the animal kingdom. The three primary guiding tenets of the Seeds of Origin are:

- Black Authority is the original seed
- white animals are the product of the original seed
- restoration of the natural order is inevitable

The goal of Seeds of Origin is to enlighten Man and animal to the power of living within the natural structure, confines, and governance of the original seed.

While the teachings of Seeds of Origin focuses on the relationship between Black Male Authority and the white male animal, all facets of the philosophy can be transposed to suit Black Female Authority, Non-White Hispanic Authority, Asian Authority, and Arab Authority over white male and white female animals.

Followers of Seeds of Origin understand that Black Authority (Male and Female) are nature's first seeds and therefore are the parent race. We know that the white animal is the lowest biped on the planet and thus must be brought back in line with its natural status — at the feet of the higher authorities.

The animals' natural fear of all things greater than themselves has been highly detrimental to the development of the animal throughout history. It is the white male animal that perfected war and conquest, human slavery and subjugation, prejudice and bigotry, and the lie that white might is right. This fear is the source of the white male animals' eventual reckoning and its modern, more productive beginning.

About WMA Inventory

The White Male Animal (WMA) Inventory is an attempt by Seeds of Origin to obtain an in-depth insight and perspective of the modern white male animal -- its natural drives, its base needs, and its ability (or lack thereof) to own its truth. Data secured through the Inventory will serve both as a management tool for Black Authorities and as a catalog displaying the variety and sameness of white male animals.

Animals will gain knowledge about themselves as both individuals and as a species. Much too often, animals are not only unenlightened to the truth, but they also are unaware that as a group, they share many of the same traits, habits, proclivities, and aspirations. Seeds of Origin endeavors to shine light into the darkness that is the destiny of white male animals, and the Inventory is vital to the success of our mission.

Results of the Inventory rely on the truthfulness of respondents to submit revealing and personal but non-identifying details. The census is self-reporting with no claims of a scientific foundation. However, the principles of Seeds of Origin serve as the guiding authority of the Inventory.

This project is an ongoing endeavor for gathering statistical and respondent data about white male animals and Black Authority. Asian, white-Hispanic, and middle eastern animals are all invited to participate as are all non-white Authorities.

Revised updates will be published as and when sufficient data is collected.

The Inventory is a nonscientific resource. Seeds of Origin collects data without judgment, prejudice, or preconceived outcomes. All evaluations, assessments, and conclusions are left to the end user.

Animal Results: In Numbers

Qualification

When asked, “How does it consider itself?”, 4.4% of the white male animals responded as straight. This number is up from the previous Inventory which was 3.1%. As expected, based on real-world experience, this number has expanded and is expected to continue to rise as more animals participate.

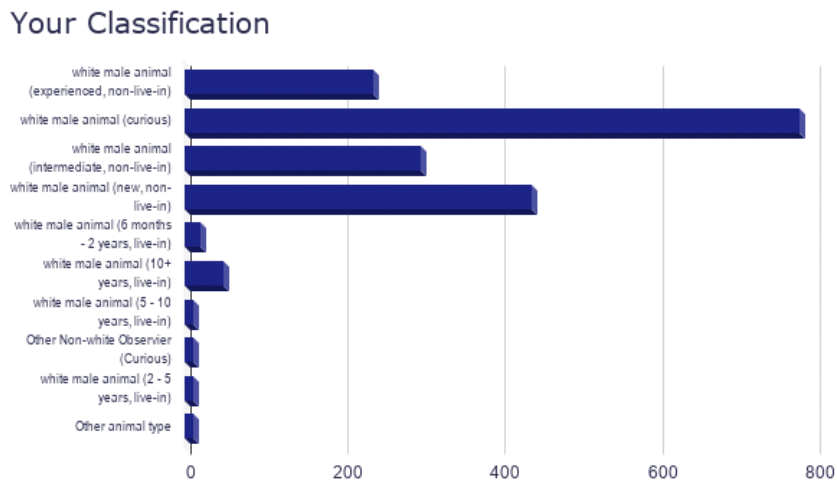

The percentage of animals responding as bi, seem to meet our expectations. Real-world experience tends to include a small number of straight animals who, in actuality, secretly desire to experience being dominated and controlled by Black Men. By registering as bi, these straight animals feel protected and uncommitted to their dark needs.

With a total of 68.1%, there is no surprise with the gay animal count -- this is not to say that gay animals in general desire to be dominated and controlled by Black

Men. Indeed, a great deal of these animals are aware that this is their only way of reaching the fullness of animal freedom. Real-world experience dictates that a small percentage of straight animals are in this group — generally, these animals are willing to commit to a situation wherein force, shame, or either physical or psychological exploitation are employed to overpower them into submission to Black Men.

True animals understand that how they consider themselves is unimportant -- the determinant factor in these cases is based on the Black Authority under whom they serve. Black Men are not concerned about an animal's self considerations as the animal will be used and exploited to suit their needs, desires, expectations, and dictates.

Generally speaking, the vast majority of wild and unaware animals assume they are straight. Wary animals who are either pretending, or unsatisfied with their functionality, or are feeling incomplete, and longing for self-truth, will find themselves registering as bi or curious. Both of these groups know they are missing a part of who they are. They are either actively or subconsciously seeking freedom in truth.

The number of animals registering as curious met our expectations. This group regularly includes a large number of straight and untried bi animals who are curious about being dominated by Men in general -- with Black Men as their ultimate aspiration. They tend to experiment with non-Black Men before they finally submit to their base needs.

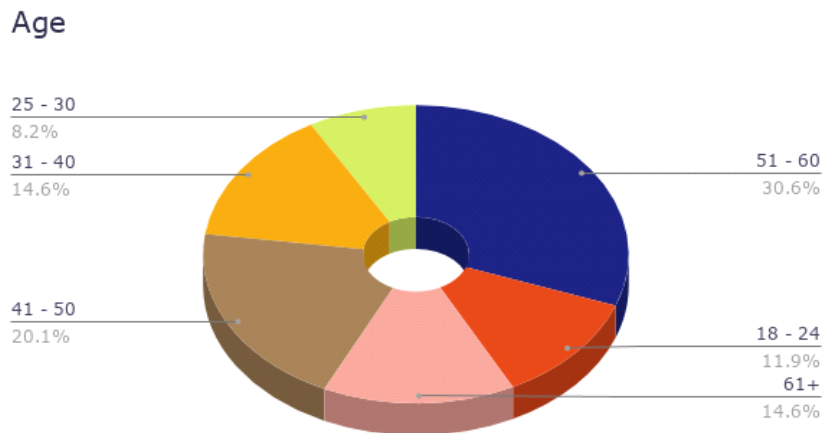

This group also includes a large number of young animals — usually between 18 and 24 years old. Animals in this age group have less life experience and are

more enthusiastic about giving in to their curiosities. They are also more likely to want a Black Man to give them purpose, guidance, and the freedom to step away from the vigors of youth, uncertainty, and lack of confidence. These animals' minds are still at their peak of malleability, which makes them extremely receptive to intense training and programming.

The total number of non-live-in animals, while seemingly high, is to be expected. Real-world experience tells us that there are three primary reasons for this.

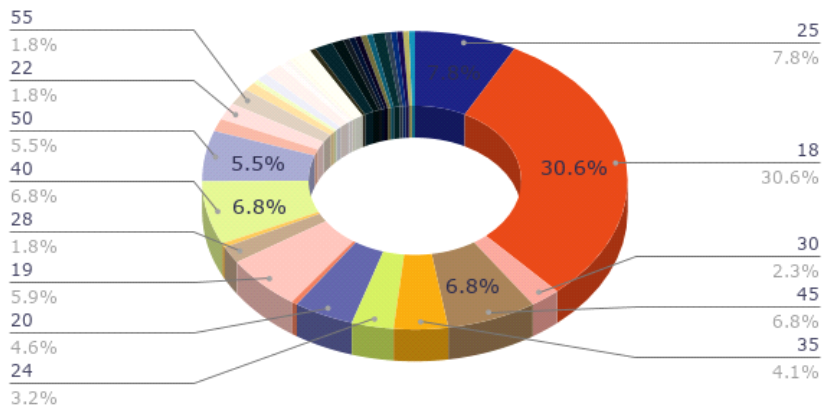

1. Animals are either unwilling or unable to commit to live-in arrangements. Family, work/business/profession, or distance may keep an animal from becoming live-in.
2. There may not be an available Black Authority -- this includes Black Authorities that do not desire live-in situations or are presently unable to accommodate.
3. Lack of suitability. Animals that have been allowed to run wild for too long or who are in desperate need of breaking may be ill-suited for live-in.

All three of these points can be overcome, making a live-in situation feasible.

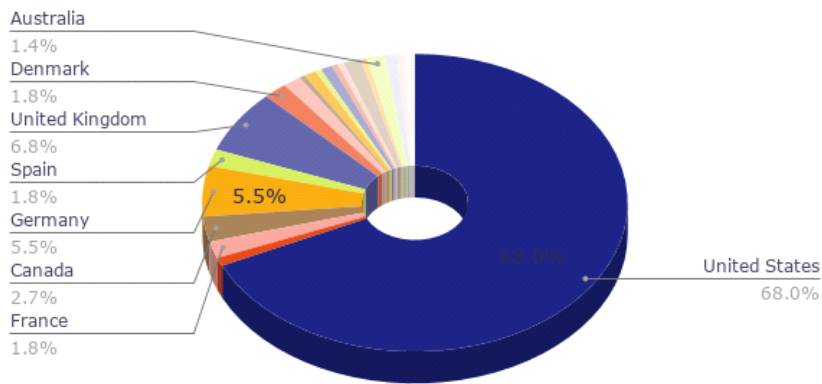

This is a broad view of the wide age span of the white male animals participating in the inventory to date.

Age of self realization?

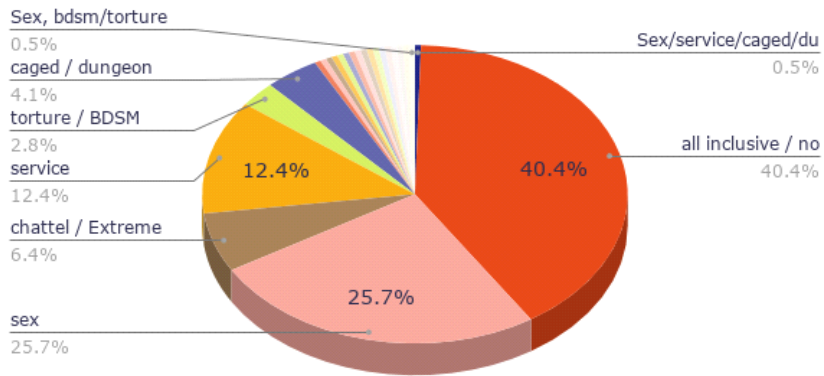

Our present findings show that the greatest number of animals realized their animal interests/natures at or around age 18. Our initial question was, “could this be the result of youthful horniness, eagerness to experiment/rebel, or the natural awakening of the animal self?” The realization issue requires further research.

Country

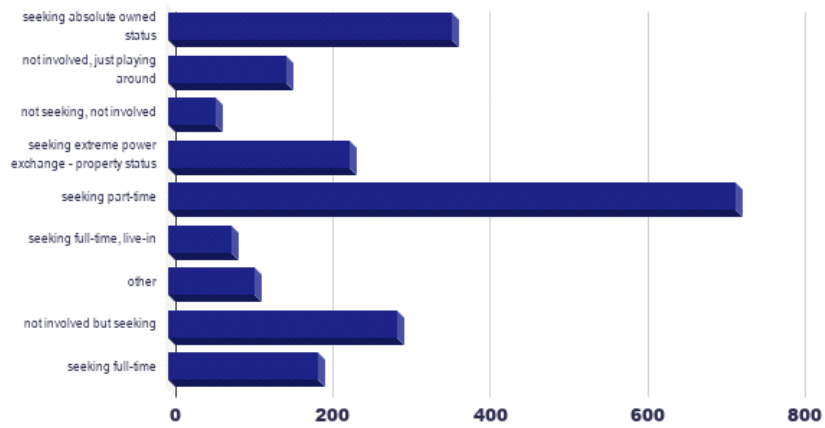

The most significant number of animals participating in the inventory thus far tend to be based in the United States, with the next largest group originating in the United Kingdom. Base on non-scientific data, it is expected that Europe, in general, will outpace the United States. While Asia and South America lack representation here, future counts should see a noticeable change as more animals are made aware of the inventory process.

Initial Introduction to Animal Self

Every animal that participated in the WMA Inventory was asked to describe their initial introduction to their animal self. This is a cross section of some of the responses. Seeds of Origin has performed very little editing — limited edits to protect privacy concerns only. Every sentiment belongs to the animals themselves. Every statement is published just as it was submitted by the animal. Each animal has been assigned a coded number for privacy purposes.

	flogged/whipped in front of the other attendees. He released me later (we lived in different states) and I began seeking out Black Men to serve. My first Master sold me to a friend and I served him for one year, till he went out the country. He trained me by punishments. I felt very satisfied being slapped, whiped and used sexually. Now I'm alone and I feel like an abandoned dog. I need urgently a black dominant Master who knows how to treat His white animal.
RQBS	In addition to the hugely hung man I sucked on demand, I have met numerous Black Men through online sites. One Man would have me dress in heels, lingerie, and subtle lipstick for Him. I would be made to clean His house while dressed like that while he watched football. When I was done and He had inspected my work, I would be made to kneel in the shower and He covered me in His strong piss. I then would suck and lick His cock, balls and ass before He would bend me over a chair and fuck me.
G4NF	I have served as a urinal, ashtray, cumdump, domestic servant, humiliation toy.
T9RR	Because I became sick with ED (erectile dysfunction - my dick never will get hard again and shrunk!) and the time I invited my submissive gayness I looked for a real MASTER but I only met white men who had been interested in BDSM. I'm not in BDSM, senseless pain and so on but I think good words and a rod are good teachers to show the slave how to behave or correct its behaviour. Because I know all human beings origin had been the SUPERIOR BLACK RACE I believe in BLACK NEW WORLD ORDER - BNWO where all whites must be enslaved, sissyfied and treated like animals. Me, I myself urgently need to be leaded and treated like an animal to obey and please my new BLACK OWNER. I read many books about slavery, watched videos and talked with good friends (gays) and these two real slaves as well as the only MASTER about a life as a subhuman animal and I am convinced to become a good slave. That's my fate and life...

The owner was a professor of anthropology and sociology and taught it about BLACK SUPREMACY. it was released in 1985 when the Owner became ill and relocated to Atlanta to be with family. throughout the

	90's in sought ownership again and had some success but nothing that lasted in 2003 it met a white Daddy/Master who understood its animal nature and collared it and it was owned by Him till 2005. it experienced extreme bondage training under Him, it was kept in chastity and was whored out almost daily by Him. HKPS	I enjoyed being naked and crawling on all fours and acting like a dog, barking at Master's command, and it was interesting eating with just my mouth and tongue.

2KQJ	Owned until owner had to relocate out of the area.
5VQF	primarily through imagination and online stories, with some minor self hypnosis.
6QEV	I have a deep seeded need to be used and abused. In all relationships, whether they be dating, friendship, or casual acquaintance I always defer to others. I have invited a superior man (black) to live with me rent free, he stayed for a year, I occasionally cooked and cleaned for him. (This was not a m/s situation, I did not serve him sexually)

VGP4	it has lived a life of confusion and lack of purpose and direction totally out of its element
E3DE	I just look for cocks to pleasure and me to serve,not much luck but I keep trying
45FP	served dom men - tried vanilla they never work to much missing
